Work Experience

April 2021 - Now

Manabie International

Front-End developer (team size: 11)

Part of a tight-knit team of designers, developers and critical thinkers. I built MVP products for Japanese schools to bring an e-learning platform with good user experience.

Projects

- Notification and chat
  Managing and push notification message from admins, teachers for parents, students
- Books, Learning Materials
  For teacher to create online study, homework, exam
- Schools Content Import/Export
  Quick contents generation for admins and teachers to create Learning Materials, Courses, Metadata,...

Main tech stack

Typescript, ReactJS, MaterialUI, React-hook-form, React-query, gRPC, GraphQL, Hasura, Redux.

Unit testing

React Testing Library, Jest.

Automation testing

Cypress frameworks, Playwright, Cucumber/Gherkin syntax.

3rd party integration

ZegoCloud, Appsmith, Learnosity

2019 - 2020

FPT Software

Front-End developer (team size: 9)

Joined an internship program and qualified to tag along with the development team to build CMS product for Japanese client.

Projects

- Product management dashboard
  A dashboard for user to input data for statistic and managing product list

Main tech stack

Javascript, VueJS, Vuex, Bootstrap, SCSS, Restful
